

## *Colorado Springs Electrical Contractors*

---

**Rockhill Electrical Systems** has become one of the premier providers of quality electrical work in Southern Colorado. Owner Dan Rockhill is a Master Electrician with 36 years in the trade, and has a reputation for honest, trouble free, on-time, and on budget installations. Because we're based in the Old Colorado City area, our electricians can respond to your requests immediately.

From smoke alarm installation to panel upgrades, we perform the work that provides you with the electricity you need. Make your home or business more functional with electrical installation from our contractors in Colorado Springs, Colorado.

### ***Electrical Services in Colorado Springs***

#### ***Industrial***

Keep the machines running and stay on schedule with industrial electrical services from us. Before we do any maintenance or repairs, we troubleshoot to identify the problems. Service includes:

*Interior and Exterior Light Fixture Installation | Main and Sub Panels | Branch Circuit (Equipment Connection) | Controls Panel Installation*

#### ***Commercial***

Rockhill Electrical Systems helps you efficiently run your commercial property, too. We can handle parking lot doors, power drops for power poles, dedicated electrical circuits for computers, Cat 5 wiring, lighting control systems, and even door buzzers. To ensure everything stays in working order, maintenance is also provided. Our client list includes some of the

### ***Best known organizations in the area, including:***
